Software engineer at **Palo Alto Networks** building **MCP gateways and integrations**, AI gateways, secure APIs, and full-stack products. Delivered document automation at Docxster with **45% lower processing cost**.

EXPERIENCE

Software Engineer Jun 2026 – Present
Palo Alto Networks

- Implemented **MCP authorization and OAuth consent** with client, redirect, and workspace validation; replaced in-memory registry pagination with **database keyset pagination** to bound query results.
- Improved **MCP interoperability**: fixed OAuth discovery and bodyless HTTP 204 handshakes; added unit and end-to-end tests for **unified MCP and LLM routing**.

Software Development Engineer, Backend Mar 2026 – Jun 2026
Portkey AI

- Built an **authenticated MCP registry** with gateway proxying and server listing/detail APIs.
- Built **Bedrock/Mantle and Claude-on-AWS integrations** across gateway and control plane, covering IAM authentication, streaming, file uploads, and batch APIs.
- Implemented **prompt-cache cost accounting** across Anthropic, Bedrock, Vertex AI, and Azure; distinguished 5-minute/1-hour cache writes and corrected duplicate token counting.

Associate Software Engineer Apr 2025 – Mar 2026
Docxster

- Built **Docxster Drive**: file/folder management, project-level RBAC, workflow integration, and typo-tolerant document search with Meilisearch and OCR.
- Integrated Google Document AI and Amazon Textract for multilingual processing, **reducing cost by 45%**.
- Built a bidirectional cloud/on-premise sync agent, **reducing manual effort by 60%**; delivered live status updates through GraphQL subscriptions.

Earlier at Docxster: Software Development Engineer Intern (Dec 2024 – Mar 2025).

PROJECTS

Braventex – Student Community Platform braventex.in | 2026

- Built a **Next.js, Fastify/GraphQL, PostgreSQL, and Prisma** platform with verified college-email onboarding, communities, study resources, moderation, and WebSocket direct messaging.
- Implemented rotating JWT refresh tokens with multi-tab race handling and personalized feed ranking; added API integration tests across authentication, content, messaging, and administration.

SKILLS

MCP & AI: Model Context Protocol (MCP), MCP gateways, AI gateways, OAuth 2.1, PKCE

Languages: TypeScript, JavaScript, Go, Python, SQL

Backend & Web: Node.js, Fastify, GraphQL, REST APIs, Next.js, React, Django, WebSockets, SSE

Data & Cloud: PostgreSQL, Redis, Prisma, AWS, Docker, Kubernetes, Helm, GitHub Actions

EDUCATION

University of Pune (Savitribai Phule Pune University) **CGPA: 8.32/10**
Bachelor of Engineering in Information Technology Dec 2021 – Jun 2025

ACHIEVEMENTS

NASA Space Apps 2024 Global Nominee – Lead developer, React/Django SDG education platform.

PICT Concepts 2025 Winner | **GATE 2024 Qualified**
