

Devansh Dubey

SOFTWARE ENGINEER | BACKEND & AI INFRASTRUCTURE

Bengaluru, India | +91 73111 21234 | devanshdubey0012@gmail.com

devanshdubey.com | github.com/Devansh0012 | linkedin.com/in/devanshdubey1

SUMMARY

Software engineer at Palo Alto Networks building AI gateways, MCP integrations, and full-stack products. TypeScript, Go, and Python; delivered document automation with **45% lower processing cost**.

EXPERIENCE

Software Engineer

Jun 2026 - Present

Palo Alto Networks | Bengaluru, India

SDE Backend

Mar 2026 - Jun 2026

Portkey AI | Bengaluru, India

Continuous AI gateway work; transitioned following the Portkey acquisition.

- Built **Bedrock/Mantle and Claude-on-AWS integrations** across gateway and control plane, covering IAM authentication, streaming, file uploads, and batch APIs.
- Implemented **prompt-cache cost accounting** across Anthropic, Bedrock, Vertex AI, and Azure; distinguished 5-minute/1-hour cache writes and fixed duplicate token counting.
- Built an **authenticated MCP registry** across gateway and control plane; replaced in-memory pagination with database keyset pagination to bound query results.
- Fixed MCP OAuth discovery and HTTP 204 handshakes; added **unit and end-to-end routing tests**.

Associate Software Engineer

Apr 2025 - Mar 2026

Docxster | Bengaluru, India

Promoted from Software Development Engineer Intern (Dec 2024 - Mar 2025).

- Built **Docxster Drive** with file/folder management, project-level RBAC, workflow integration, and typo-tolerant full-text search using Meilisearch and OCR.
- Integrated Google Document AI and Amazon Textract for multilingual document processing, **reducing processing cost by 45%**.
- Built a bidirectional cloud/on-premise synchronization agent, **reducing manual sync effort by 60%**; delivered live status updates through GraphQL subscriptions.

PROJECTS

Braventex | braventex.in

2026

TypeScript, Next.js, Fastify, GraphQL, PostgreSQL, Prisma, WebSockets

- Built a **Next.js + Fastify/GraphQL** platform backed by PostgreSQL and Prisma, with student communities, study resources, moderation, and WebSocket direct messaging.
- Implemented college-email verification, rotating JWT refresh tokens with multi-tab race handling, and personalized feed ranking using social and engagement signals.
- Added API integration tests for authentication, password reset, posts, communities, messaging, study rooms, and administrative bans; configured Docker/Railway deployment.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Go, Python, SQL

Backend & Web: Node.js, Fastify, GraphQL, REST APIs, Next.js, React, Django

AI & Protocols: Model Context Protocol (MCP), OAuth 2.1, PKCE, WebSockets, SSE

Data & Cloud: PostgreSQL, Redis, Prisma, AWS, Docker, Kubernetes, Helm, GitHub Actions

EDUCATION

B.E. in Information Technology

Dec 2021 - Jun 2025

K. K. Wagh Institute of Engineering Education & Research, Nashik

Savitribai Phule Pune University | CGPA: 8.32/10

ACHIEVEMENTS

NASA Space Apps 2024: Global Nominee; lead developer, React/Django SDG education platform.

PICT Concepts 2025: Winner | **GATE 2024:** Qualified
